SAFETY CONSULTING

OVERVIEW & SERVICES

NATS

PROVEN SOLUTIONS TO PRIORITIZE SAFETY AT EVERY LEVEL

SAFETY CONSULTING SERVICES

NATS safety consulting services offer clients a variety of solutions beyond the scope of direct training by working alongside field level craft workers and management to help find the best solutions to complex situations. Our safety professionals utilize state-of-the-art technology to capture data in the field and create an efficient, streamlined reporting mechanism for the client to evaluate and map trends of leading indicator-focused data.

Our safety expertise and familiarity with high-risk environments positions us well to support our nation's critical infrastructure workers who remain on the front line.

OUR SERVICES

- Safety consulting including field monitoring and reporting
- Disaster response risk mitigation
- Tailgate safety meetings
- OSHA-compliance training
- Job site, on-boarding, and skills evaluation
- Safety program review and GAP analysis reporting
- Qualification assessments including data analytics
- Safe work procedures and best management practices (BMP)
- Professional incident and root cause analysis (RCA)
- Subject matter experts available to answer your questions and help to ensure OSHA compliance

BENEFITS

- Our primary goal is to help you meet your project goals and deadlines by bringing everyone home safely, protecting properties, and ensuring compliance along the way
- Improve retention of employees and subcontractors by increasing productivity through enhanced training, efficient safety protocols, and pre-determined measurable outcomes
- Enable clients to scale more quickly and assess in-house and subcontractor's safety performance
- Focus resources where they are needed most
- Provide metrics and analytics that are unparalleled in the industry delivered in a concise, easy to comprehend format
- Better manage subcontractors through improved review and accountability programs
- Third party incident investigation
- On-the-job training*
- Facilitate engaging, incident-specific safety tailgate meetings
- Virtual training (open enrollment or custom-built courses to meet client's needs)
- Digital and remote support for contractors involved in the maintenance of critical infrastructure

* When requested

COMPETENCY ASSESSMENTS

Our industry-leading competency assessments, specifically built off the federal OSHA regulations, industry consensus standards such as ANSI Z133, and industry best practices, are evaluations of the work procedures that the workers are responsible for. While others in the industry are simply computer-based assessments, NATS assesses whether workers can do the physical task through hands-on assessments. Our competency assessments provide clients with analytics detailing the skills throughout all levels of your organization to include a change in performance after completing training.

QUALIFICATIONS & EXPERIENCE

Our safety team's combined qualifications:

- Certified Project Managers
- Advanced emergency medical training (EMT, AEMT, wilderness, etc.)
- ISA Certified or Board Master Arborist (or other relevant ISA qualifications)
- TCIA CTSP or other relevant certifications
- Tree Risk Assessment Qualification
- Arboriculture, Vegetation Management, Forestry, or other related degree
- Licensed crane operator
- OSHA-Authorized Trainer
- Heavy equipment operation such as log loaders, excavators, Senneboggens
- Certified lineman
- Wild land firefighting experience
- College level courses pertaining to report writing and computer technology
- Subject Matter Experts
- ANSI Committee Members
- Commercial driver's license

WRITTEN PROGRAMS

Our safety consulting services provide clients with a comprehensive range of essential offerings specifically designed to enhance workplace safety. With safety policy and procedure review and Verification, we meticulously assess and refine protocols to ensure regulatory compliance and best practices. Through expert root cause analysis and accident investigation, we uncover insights into incidents, enabling targeted improvements for prevention. Our customized safety manuals provide comprehensive guidelines, fostering a culture of safety. Lastly, our customized corrective action plans offer strategic pathways to address identified gaps, ultimately promoting a safer and more secure working environment. **Partner with us to access a range of proven solutions that prioritize safety at every level.**
